

ATLEX
STOCKYARDS

100% AUSTRALIAN FAMILY OWNED AND OPERATED
EST 1984

CUSTOM-DESIGNED
Sheepyards

SAFETY | INNOVATION | PRECISION

WOOLSHED RAMP

Made to suit your woolshed door dimensions using galvanised sheet to prevent sheep baulking.

LOADING RAMPS

6m and 8m permanent or mobile heavy duty loading ramps with sheeted sides, walkway and handrail. A 6m light duty loading ramp is available and ute ramps with removable sides for easy storage.

**INNOVATIVE
FEATURES**

ATLEX STOCKYARDS has unrivalled industry experience and product development. We will work with you to determine what design options and features will work best for you - both now and into the future.

**SMOOTH TOP
WORKING RACE**

Prevents drench or jetting hoses snagging on posts or pulling hose off backpack. Standard width 600mm. Double working race option with or without walk down middle.

Adjustable Tapered Drafting Race

Prevent sheep turning and ability to double drafting speed- or slow if necessary. 3300mm length x 600mm width (can taper to 200mm). Draft gates with bent handles prevent hands slamming.

Hawker Tip Swing Block Gate

Quickly blocks draft or working race. Swings back neatly and sits flush along-side race so it's out of the way. No chains or catches!

Safety Manways with Dog Flap

No more climbing or jumping, making it easier and safer for people and dogs. Our biggest feedback from customers? That we didn't add more manways!

360 Degree Gate Hinge

Gates create flexibility - but a 360-degree hinge alleviates stress. Gate sits flush against either side of fence, preventing sheep from wedging behind an open gate.

Covered Working Area

We can design your yards to be completely covered - or just the working area - to create flexibility in all seasons and hours.

Toe Recess

Sheep raised to comfortable working height. Toes sit under race to reduce strain on your back.

WHY ATLEX?

We travel to you!

Nothing beats seeing a site with our own eyes and listening to you face-to-face to truly understand your needs. Like a kitchen, no two sites or sets of stockyards are the same!

It's a collaborative process!

It's better to make a mistake on paper than in practice. We work within your parameters and draw on our experience to provide you with options. You may wish to stage your project - or incorporate existing holding yards to make it more cost-effective.

We incorporate innovative stockhandling solutions!

We have unrivalled industry experience and product development. Atlex developed the concept of on property design, adjustable tapered drafting race, manways and 360-degree hinges. Pipe or oval rail available. We make provision for existing and future stockhandling equipment, such as autodrafters or weighing equipment.

We support you from start to finish!

From personalised on-property design, to site preparation and construction guidance, and personal follow-up service including five-year warranty, we are with you every step of the way.

Stockwork is in our blood!

Ian Crafter and Tom Austin, our Senior Stockyard Designers, both grew up on sheep and cattle grazing properties, and continue to run sheep today.

Your stockyards will last 50 years!

We only use the best heavy-duty galvanised steel and materials to ensure your yards will last the distance.

"It's been extraordinary to see the lift in everyone's enthusiasm for sheep work!" *Digby Stretch, Kojonup, WA*

"It means **we can do all the jobs that we want to do** rather than the jobs that just need to be done." *Jeff Stoney, Gnowellen, WA*

"We did not imagine the investment in Atlex yards would have such a big impact on our operation. Working with sheep is now an absolute pleasure. No stress, more efficient and every operation is completed in much less time." *Bert Woolford, Kimba, SA*

"They just flow so well. We used to force them forward all the time. They hated it. The time of day had to be right. The shadows had to be right. Everything had to be right. And now, they just run." *Craig Needs, Lameroo, SA*

"Atlex has been great to work with. Lots of ideas and suggestions, **high quality product and speedy completion.** I am now much happier knowing my family and our sheep are much safer when doing sheep work" *Sam Dohle, Tahara, VIC*
