

# Why You Should Register For One Biosecurity (1B) Today!

## 1B Enables Transparent Informed Livestock Trading

The One Biosecurity Program provides the **only** credible framework for risk based livestock trading.

With the recent changes in Johne's and Footrot programs, One Biosecurity fills the information void that currently exists in livestock trading. Producers are demanding information for making wise livestock trading decisions. One Biosecurity provides all that and more.

**All sellers and purchasers of livestock should register for 1B now!**

One Biosecurity provides the following benefits for livestock trading:

- A platform for promoting your business
- Greater and more accessible information to make purchasing decisions
- A more equitable system for trading
- Greater trading confidence and more trading options
- Greater transparency throughout the production chain

## 1B Helps You Benchmark Your Livestock Biosecurity Practices

It helps you measure how well you are doing in managing the health and welfare of your livestock and stimulates improvement and best practice.

Biosecurity is the prevention and management of threats to your livestock enterprise so any program that focuses on this will naturally lead to:

- Improved on-farm biosecurity
- Improved animal health
- Improved productivity/profit

Biosecurity is fundamental to the success of your business

## 1B Provides Essential Industry Documents - Quickly and Easily!

Provides an industry approved Biosecurity Plan that is a living document for ongoing improvement

- This is mandatory for LPA accredited producers and for JBAS accreditation.

Provides a Pre-filled Sheep/Cattle Health Declaration – saving you time!

## 1B Provides Many Additional Benefits

- 1B promotes, encourages and educates best practice. It is a program that builds your future.
- 1B builds reputation and trust for both individual enterprises and also for your industry as a whole.
- 1B focuses on what you do well and seeks to create winners
- 1B leads to greater resilience to face change and challenges

## 1B Delivers Broader Industry Benefits

**Anything that benefits your industry benefits your individual production system**

One Biosecurity will:

1. Provide credible assurance to existing domestic and international markets and help SA meet potential new market access requirements
2. Improve government/industry disease surveillance and analysis capabilities, which are vital to maintaining the State's favourable animal health status and markets!
3. Better equip the livestock sector for potential animal health emergencies through the following areas:
  - Prevention – better biosecurity across the state decreases the likelihood of the introduction of exotic diseases
  - Preparedness – better biosecurity makes our industry better prepared for an incursion
  - Response – better biosecurity increases the likelihood for earlier detection, faster response and less spread
  - Recovery – improved response leads to a quicker recovery. The inherent improved biosecurity reputation of SA will lead to export restrictions being lifted more swiftly.

## 1B Provides the Benefits of an Online System

- Provides a dynamic, living document, ongoing use and benefit, easy to edit and update
- Instant access, widespread engagement, better communication
- Transparent, readily available for all to see, leading to greater accountability
- Enhances the verification process and thus the credibility of the system
- Flexibility
- Continual promotion of your enterprise and the SA livestock industry

**So do not delay! Register today!**
