

Ram Check

“Improving productivity by monitoring ram health”

Come along and learn how to assess ram health prior to joining to ensure you can get the best out of your rams.

Friday 13th July, 9:30am to 1:00pm

Shearing shed – 1045 Snodgrass Road, Pyap West

\$20 per family for donation to Cancer Research, places are limited

The day will start with the theory about ram health and performance, followed by a practical session on assessing rams prior to joining.

Follow the Ram Health Checklist to make ram assessment easy!

At the end of this workshop, you will:

- understand the factors affecting ram performance
- understand the impact of sub-optimum ram performance
- be able to assess rams prior to joining
- know about the services available to you through Biosecurity SA
- know about Q fever

Event hosted by Mantung Maggea Land Management Group

For registrations, contact Warren 8589 7039 – places are limited

Lunch provided

This event is supported by the South Australian Murray-Darling Basin Natural Resources Management Board
